Press Release

For Immediate Release

Orlando, Florida, December 27, 2012

RIEGL USA to attend HYPACK 2013

RIEGL USA will be attending the HYPACK 2013 Hydrographic Training Conference in Savannah, Georgia.

The conference will be held at the Westin Savannah Harbor Golf Resort and Spa in Savannah from January 7 through January 10, 2013.

Be sure to stop by our booth, booth #7, during the conference. We will have representatives from *RIEGL USA* present to answer any questions you may have about our products.

About *RIEGL USA*:

The key factor to *RIEGL USA*'s success is providing complete support and reliability to our customers. From your initial purchase, to integration of the system, as well as training and support, *RIEGL USA* stands out in the industry as a leader. *RIEGL USA*, located in Orlando, FL, is the North American office for *RIEGL Laser Measurement Systems, GmbH*. With over 19 years of experience, *RIEGL USA* delivers quality airborne, mobile and stationary terrestrial laser scanning solutions.

RIEGL Laser Measurement Systems, GmbH, is headquartered in Horn, Austria. *RIEGL* has more than 30 years' experience in the research, development and production of laser rangefinders, distancemeters and scanners. *RIEGL* is dedicated to designing, developing, and producing the best possible laser sensors for the desired application in order to perfectly fulfill the given measurement tasks and therefore, fully satisfy the customers' expectations worldwide.

RIEGL USA is recognized as the performance leader in the mobile mapping, civil infrastructure, airborne scanning, hydrographic, mining and terrestrial based industries. Our instruments are well known for their ruggedness and reliability under demanding environmental conditions. *RIEGL's* various 3D scanners offer a wide array of performance characteristics and serve as a platform for continuing "Innovation in 3D" for the laser scanning business.
